## NOTES

- The figures include the financing of the "correction of budgetary imbalances in favour of the United Kingdom" (UK correction) for the previous year as well as adjustments for earlier years. UK correction payments recorded under the VAT- and GNPbased own resources payments during the period 1992-2000 are included. The sums do not add up to zero because of exchange rate differences.
- The 10 new Member States, which joined the EU on 01.05.2004, made UK correction payments only from this date onwards (i.e. during $2 / 3$ of the year 2004).
-The unusually high amount of the UK correction in 2001 is due to the combined effect of the simultaneous increase of the corrections relative to several years but all budgeted in 2001.
- Up to the year 2001, only Germany had a reduction (2/3 of its normal share) in the financing of the UK correction. As from the year 2002, the shares of
