Council Regulation (EC, Euratom) No 1995/2006 of 13 December 2006 amending Regulation (EC, Euratom) No 1605/2002 on the Financial Regulation applicable to the general budget of the European Communities

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 279 thereof,

Having regard to the Treaty establishing the European Atomic Energy Community, and in particular Article 183 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament ⁽¹⁾,

Having regard to the opinion of the Court of Auditors ⁽²⁾,

Having regard to the opinion of the European Economic and Social Committee ⁽³⁾,

Whereas:

(1) Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities ⁽⁴⁾ (hereinafter the Financial Regulation), lays down the legal foundations of the financial management reform. As such, its essential elements should be maintained and strengthened. Transparency, in particular, should be reinforced by providing for information on beneficiaries of Community funds. Moreover, the budgetary principles established by the Financial Regulation should be respected in all legislative acts and derogations should be kept to a strict minimum.

(2) In the light of practical experience, certain amendments should be made to the Financial Regulation in order to facilitate budget implementation and the attainment of the underlying policy objectives and to adjust certain procedural and documentary requirements so as to make them more proportionate to the risks and cost involved, in accordance with the principle of proportionality as set out in the third subparagraph of Article 5 of the EC Treaty.

(3) All amendments should contribute to achieving the objectives of the Commission's reforms and help improve or ensure sound financial management, thus contributing to obtaining a reasonable assurance of the legality and regularity of financial operations.

(4) Account should be taken of provisions implementing the revenue and expenditure of the budget, contained in the basic legal acts adopted for the period 2007 to 2013, in order to ensure coherence between those acts and the Financial Regulation.

(5) It should be clarified that sound financial management requires effective and efficient internal control, and the main features and objectives of internal control systems should be defined.

(6) In order to ensure the transparency of the use of funds deriving from the budget, it is necessary to make available information on the beneficiaries of these funds within certain limits necessary to protect legitimate public and private interests and taking into account the particular accounting period for the European Agricultural Guarantee Fund.

(7) As regards the principle of unity of the budget, the rule governing interest generated by pre-financing should be simplified. The administrative burden involved in the recovery of that interest is disproportionate to the objective pursued and it would be more efficient to allow interest to be set off against the final payment to the beneficiary.

(8) With regard to the principle of annuality, more flexibility and transparency should be introduced to respond to functional needs. The carry-over of appropriations should exceptionally be permitted in the case of expenditure on direct payments to farmers under the European Agricultural Guarantee Fund (EAGF) set up by Council Regulation (EC) No 1290/2005 of 21 June 2005, on the financing of the common agricultural policy ⁽⁵⁾.

(9) Payment requests from the Member States under the new agricultural regulations will be concentrated overwhelmingly at the beginning of the budget year *n*. Therefore, the maximum threshold for advance commitments against the EAGF (from 15 November of year *n-1*) to cover routine management expenditure (charged to the budget of year *n*) should be increased to three quarters of corresponding appropriations in the last adopted agricultural budget. As regards the limit on advance commitment of administrative expenditure, the text should be amended so that it refers to appropriations decided by the budgetary authority, therefore excluding transfers of appropriations.

(10) The use of non-differentiated appropriations for veterinary measures, charged against the EAGF, unduly hampers the implementation of such measures, especially in respect of the limits placed on the possibilities for carry-overs. The use of differentiated appropriations for such expenditure should therefore be permitted, as this is more in keeping with the multi-annual nature of the actions.

(11) As regards the principle of universality, two points should be added to the list of assigned revenue. First, as is currently possible under specific research programmes, it should be possible for the Member States to make ad hoc contributions, as assigned revenue, for projects under external relations programmes managed by the Commission. Second, proceeds from the sale of vehicles, equipment, installations, materials, and scientific and technical apparatus which are being replaced or scrapped should be treated as assigned revenue, as an encouragement to authorising officers to obtain the best prices for their disposal.

(12) At present, the Commission must be authorised by the budgetary authority before accepting any donations, such as gifts or bequests, which involve a charge. To avoid unnecessary and cumbersome procedures, authorisations should be made compulsory only in the case of donations exceeding a certain value and involving significant charges.

(13) The rules governing transfers of appropriations should be simplified and clarified on certain points because they have proved cumbersome or unclear in practice.

(14) For reasons of efficiency, the Commission should be allowed to decide autonomously on transfers from the reserve in cases where no basic act exists for the action concerned at the time when the budget is established, but where the basic act is adopted in the course of the year.

(15) The rules on the Commission's administrative transfers should be adapted to the new Activity-Based Budgeting (ABB) structure. Thus, provision should be made for an exemption from the 'notification procedure'. During the last month of the financial year, the Commission should be allowed to decide autonomously on transfers of appropriations concerning staff expenditure, within certain limits.

(16) A number of articles of the Financial Regulation should be amended because of the abolition of the reserve relating to Community loans and loan guarantees to third countries, and because of the adoption of a new provisioning mechanism for the Guarantee Fund for external actions.

(17) In order to accelerate the mobilisation of funds in exceptional cases of international humanitarian disasters and crises occurring at the end of the budgetary year, the Commission should be allowed to autonomously transfer unused budgetary appropriations available under the relevant heading of the multiannual financial framework to the budget titles concerned.

(18) As regards the budget procedure, the requirement laid down in the Financial Regulation that the budget be published within two months of adoption has proven unrealistic, and three months would be more practicable. The concept of an 'Activity Statement' should be inserted into Financial Regulation in order to

render official one of the key elements of ABB, and the content of such statements should be defined more precisely in order to make them operational. Payment schedules should be included in the working documents accompanying the preliminary draft budget listed in the Financial Regulation instead of in the budget itself, as they are not relevant to the budgetary procedure and are unnecessarily burdensome.

(19) As regards the implementation of the budget, some adjustments are necessary in order to better reflect the specific features of the Common Foreign and Security Policy (CFSP). For reasons of legal clarity, the forms basic acts can take under the EC Treaty and under Title V and VI of the Treaty on European Union should be identified in the Financial Regulation instead of in the implementing rules. In addition, a specific provision should be added in order to properly reflect the types of preparatory measures that may be undertaken in the field of the CFSP.

(20) As regards methods of management, the relevant Article of the Financial Regulation should be restructured for the purpose of clarity. It is also necessary to remove the limitation of shared management to the European Agricultural Guidance and Guarantee Fund (EAGGF) and Structural Funds, because additional programmes will now operate under shared management. The requirements for joint management need to be made clearer. The relevant provisions of the Financial Regulation should be completed to include in particular the European Investment Bank and the European Investment Fund as Community bodies to which tasks can be delegated by the Commission. The criteria set out in the Financial Regulation for using national public-sector bodies should be simplified in order to facilitate their use and to respond to growing operational needs, and the scope of the provision should be extended to international public bodies. The Financial Regulation should also clarify the position of special advisors or heads of mission appointed by the Council to manage certain actions in the context of the CFSP.

(21) The responsibilities of the Member States under shared management should be set out in more detail, to take account of the ongoing discussions between the institutions concerning the discharge procedure and the appropriate control systems to put in place, reflecting the mutual responsibilities of the Member States and the Commission. Following the Interinstitutional Agreement of 17 May 2006 between the European Parliament, the Council and the Commission on budgetary discipline and sound financial management ⁽⁶⁾, Member States should be obliged to produce an annual summary of the available audits and declarations in relation to the funds under shared management.

(22) The prohibition on delegating implementation tasks to private bodies should be modified in the Financial Regulation because the terms of that prohibition have turned out to be unnecessarily strict. It should be possible, for example, for the Commission to engage the services of a travel agency or a conference organiser to take charge of reimbursing the costs of participants at conferences, provided that no discretionary powers are exercised by the private company.

(23) The establishment by several institutions of joint financial irregularities panels should be made possible.

(24) Accounting officers' responsibility for certifying the accounts on the basis of the financial information supplied to them by the authorising officers should be clarified. To this end, the accounting officer should be empowered to check the information received by the authorising officer by delegation and to enter reservations, if necessary.

(25) The relationship between the Commission's internal auditor and bodies set up by the Communities should be clarified. Those bodies should have their own internal audit function reporting to their own management boards, whereas the Commission's internal auditor reports to the College of Commissioners on the procedures and systems of the Commission. It should be necessary for the Commission's internal auditor only to confirm that the bodies' internal audit functions meet international standards, and for that purpose he should be able to conduct assessments of the quality of the internal audit activity.

(26) A period of limitation on the validity of claims should be introduced. The Community, unlike many of its Member States, is not subject to a period of limitation under which financial claims are extinguished after

a certain period of time. Nor is the Community restricted by a period of limitation in the pursuit of its claims against third persons. The introduction of such a period of limitation corresponds to sound financial management.

(27) The Financial Regulation should reflect the importance of framework contracts in the management of public procurement. It should encourage the use of interinstitutional procurement procedures and allow for the possibility of joint procurement procedures between an institution and a contracting authority from a Member State.

(28) Certain technical adjustments should be made to ensure that the terminology of the Financial Regulation is fully in line with that of Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts ⁽⁷⁾. The possibility, open to Member States under that Directive, to determine specific procedures for contracts declared secret when their performance must be accompanied by special security measures or when the protection of the Member State so requires, should be made available to the Community institutions.

(29) In line with Directive 2004/18/EC, the rules on exclusion from a procurement procedure need to be clarified. In addition, for reasons of legal certainty and proportionality, a maximum period of exclusion should be specified in the Financial Regulation. In the light of Directive 2004/18/EC, an exception to the rules on exclusion should be made for the purchase of supplies on particularly advantageous terms from either a supplier which is definitively winding up its business activities, from the receivers or liquidators of a bankruptcy, through an arrangement with creditors, or through a similar procedure under national law.

(30) It should be made obligatory under the Financial Regulation for candidates or tenderers in procurement procedures to certify, if so requested, the ownership or the management, control and power of representation of the legal entity submitting a tender or that their subcontractors are not in one of the situations referred to in Article 93 of the Financial Regulation. Tenderers should not be required to certify that they are not in one of the situations giving rise to exclusion when they participate in a procurement procedure for the award of very low-value contracts.

(31) In order to enhance the effectiveness of procurement procedures, the database of candidates or tenderers in situations of exclusion should be common to the institutions, executive agencies and bodies referred to in the Financial Regulation.

(32) In order to take account of the interests of unsuccessful tenderers, it is appropriate to provide that a contract covered by Directive 2004/18/EC cannot be signed before the end of a reasonable standstill period.

(33) The obligations of the institutions to suspend a procurement procedure or a contract under the Financial Regulation in cases of fraud and irregularities should be clarified in order to enhance the operation of the relevant provisions of that Regulation.

(34) As regards grants, simplification of the rules is needed. The requirements for checks and guarantees should be more proportionate to the financial risks involved. The definition of grants needs to be clarified, in particular as regards financing related to loan activities or shareholdings and expenditure relating to fisheries markets. To improve the management of grants and to simplify procedures, it should be possible to award grants either by a decision of the institution or by a written agreement with the beneficiary.

(35) For reasons of clarity and transparency, the use of lump-sum and flat-rate payments should be authorised alongside the more traditional method of reimbursing costs actually incurred.

(36) For reasons of legal clarity, the exceptions to the non-profit rule which are currently provided for in the implementing rules should be included in the Financial Regulation. Furthermore, it should be made clear that the purpose of awarding grants to certain actions is to help reinforce financial capacity or generate an income.

(37) The rule that grants should be awarded on the basis of calls for proposals has proved its worth. Experience has shown, however, that in certain cases the nature of the action leaves no choice in the selection of beneficiaries; such cases should thus be exempted from this rule.

(38) The rule that the same action should not give rise to more than one grant to any one beneficiary should be adjusted. Some basic legal acts do permit Community funding from different sources to be combined, and such cases may increase in future in order to ensure the effectiveness of expenditure. However, it should be made clear in the Financial Regulation that the same costs cannot be financed twice by the Community budget.

(39) The rule that the agreement on an operating grant may not be signed more than four months after the start of the beneficiary's financial year has proven unnecessarily rigid. This deadline should thus be extended to six months.

(40) For reasons of simplification, in the case of operating grants taking the form of lump-sums or flat-rate payments, the rule that grants shall gradually decrease should be removed.

(41) Certain restrictions on the eligibility of beneficiaries should be removed in order to allow for grants to natural persons and certain types of entity which lack legal personality. In line with the principle of proportionality, for very low-value grants, the authorising officer may refrain from requesting applicants to certify that they are not in one of the situations of exclusion under the relevant provisions of the Financial Regulation.

(42) While grants will continue to be awarded on the basis of selection and award criteria, there is no need in practice to have those criteria evaluated by a committee specifically set up for that purpose, and that requirement should therefore be removed.

(43) As regards the procurement standards to be applied by beneficiaries of grants, the current rule in the Financial Regulation is unclear and should be simplified. Moreover, express provision should be made for the case in which the implementation of an action necessitates financial support to third parties.

(44) As regards the rules on accounting and the accounts, the Financial Regulation should make it possible for the Commission's accounting officer to determine, in compliance with international standards, which other bodies in addition to those receiving Community subsidies fall within the scope of the consolidation of the accounts, it being understood that the consolidation of accounts neither entails any transfer of funds from self-financed bodies to the general budget of the European Union nor influences their financial and operational autonomy and the discharge procedures for their accounts.

(45) In view of the coming into existence of the EAGF, which is to replace the European Agricultural Guidance and Guarantee Fund (EAGGF) with respect to financing of market measures from 1 January 2007, certain terminology in the Financial Regulation should be adjusted. Clarification is also required in the effect that provisional commitments may be made after the normal two-month deadline following receipt of the Member States' statements of expenditure in cases where a decision on a transfer of appropriations is expected. The special provisions of the Financial Regulation concerning transfers should be clarified.

(46) The terminology should also be adjusted so that reference is made only to the Structural Funds, the Cohesion Fund, the Fisheries Fund and the Rural Development Fund. References to pre-accession structural measures (ISPA) and agricultural measures (Sapard) should be removed, since they involve management by third countries on a decentralised basis in accordance with the Financial Regulation and will continue to be implemented largely in the same way as at present. As regards the making available again of decommitted appropriations, in line with the new basic acts for structural actions in the period 2007 to 2013 which cover the case of *force majeure*, provision should be maintained in the Financial Regulation only for cases where a manifest error is attributable to the Commission.

(47) A provision should be added to the Financial Regulation to cover the assigned revenue generated by the winding-up of the European Coal and Steel Community and the making available of the corresponding appropriations.

(48) It is necessary to allow appropriations, which have been decommitted as a result of total or partial non-implementation of the projects for which they were earmarked, to be made available again. However, that should be possible only under strict conditions, and only in the area of research, since research projects present a higher financial risk than those in other policy areas.

(49) As regards external actions, it should be clarified that, in line with existing practice, the grant procedures to be applied by third countries in the case of decentralised management have to be specified in the financing agreements concluded with those countries. The 'n+3 rule', according to which individual contracts and agreements which implement such financing agreements have to be concluded no later than three years following the date of conclusion of the financing agreement, should apply. Specific rules should be foreseen for the case of decentralised management of multi-annual programmes under Council Regulation (EC) No 1085/2006 of 17 July 2006 establishing an Instrument for Pre-Accession Assistance ⁽⁸⁾ and Regulation (EC) No 1638/2006 of the European Parliament and of the Council of 24 October 2006 laying down general provisions establishing a European Neighbourhood and Partnership Instrument ⁽⁹⁾.

(50) In order to facilitate management, it should be made possible for the institutions to delegate the powers of authorising officers to Directors of inter-institutional European Offices for the management of appropriations entered in their respective sections of the budget. While their content should remain unchanged, the relevant Articles of the Financial Regulation should be slightly re-structured in order to clarify the sub-delegation of authorising powers by the Directors of Offices.

(51) The procedure under which the budgetary authority may issue an opinion on a building project should be clarified.

(52) Successive framework research programmes have facilitated the work of the Commission by laying down simplified rules for the selection of external experts for evaluation of proposals or grant applications and technical assistance for the follow-up and evaluation of projects funded. This procedure should be made available in respect of all other programmes.

(53) Transitional provisions should be added. First, as regards the making available again of decommitted appropriations corresponding to commitments made during the 2000 to 2006 Structural Funds programming period, the case of *force majeure* should continue to be applied as provided currently in the Financial Regulation until the closure of the assistance. This is in order to avoid disruption of the current system since *force majeure* is treated differently in Regulation (EC) No 1083/2006 of 11 July 2006 laying down general provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund ⁽¹⁰⁾. Second, a transitional provision should be added to the Financial Regulation to deal with the implementation of the provisions on the central database for exclusion from participation in procurement and grant procedures. Finally, a similar provision should be added to permit the outstanding Community commitments to be financially settled in order to close the assistance provided for in the Regulations governing the Structural Funds and the Cohesion Fund for the 2000 to 2006 programming period. For the appropriations concerning operational expenditure, the possibility for the Commission to make transfers from one title to another must be retained, provided that the appropriations in question are for the same objective. Similarly, the Commission should be able to continue to make transfers from one title to another when the appropriations in question relate to Community initiatives or technical assistance and innovative measures, provided that they are transferred to measures of the same nature. This means, for instance, transferring appropriations relating to one Community initiative to another in a different title.

(54) Regulation (EC, Euratom) No 1605/2002 should therefore be amended accordingly,

HAS ADOPTED THIS REGULATION:

(c) safeguarding of assets and information;

This information shall be made available with due observance of the requirements of confidentiality, in particular the protection of personal data as laid down in Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data (*) and Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2001 on the protection of individuals with regard to the processing of

personal data by the Community institutions and bodies and on the free movement of such data (**), and of the requirements of security, taking into account the specificities of each management mode referred to in Article 53 and where applicable in conformity with the relevant sector-specific rules.

(*) OJ L 281, 23.11.1995, p. 31. Directive as amended by Regulation (EC) No 1882/2003 (OJ L 284, 31.10.2003, p. 1)

(**) OJ L 8, 12.1.2001, p. 1.’;

17. Article 33(2) is hereby amended as follows:

(a) point (d) shall be replaced by the following:

‘(d) the activity statements containing the following:
